

# Javed Ali

Lead Engineer | QA | DevOps

Bengaluru, IN

“Don't limit your challenges, challenge your limits

9 years of rich experience in Software Development, Testing & DevOps. I love to experiment and figure out ways to improve product quality. Driven by curiosity to learn & share new skills. Loves helping to strategies and facilitate testing, working with teams to incorporate those strategies into the development phase and bridging the gap between engineering teams

## WORK EXPERIENCE

Software AG  
Lead Engineer  
2020-present

Working closely with German Test Leads to make sure the test coverage is accurate and ensures all functional aspects of the code delivered have been addressed and testing is making progress with respect to the plan.

Created results interpreter & implemented failure analytics using ML based report portal to **Protractor-Cucumber test framework**

**Quarterly Award**  
**Tech-Interrupt - Global**

Identified the area where engineers were used to provision EC2 and RDS system from AWS and manage them manually. Developed and maintained the Infrastructure as a Code using Terraform to overcome manual process

Cognizant  
Senior Associate  
2019-2020

Independently designed and developed end to end automation framework for brand strategies & Consumer Privacy features for one of the retail giant Integrated third-party application APIs (OneTrust & ServiceNow) for ticket processing till completion, Implemented SMTP file validation, type- doc static page integration for code documentation

HCL Technologies  
Senior Test Engineer  
2016-2019

Automated email & SMS based TFA flows, integrated jar executables for connecting different modules using NodeJS, protractor

**Spot Awards**

Build and maintain a data-driven test framework which can be used for performing both front-end and back-end tests. Lead the automation and QE efforts for the validation of the functionality of the various modules & partner services.

FIRST AMERICAN Corp.  
QA Engineer  
2013-2016

Worked on Selenium and Coded-UI based frameworks to automate Desktop and Web application.

Participated in all stages of application life cycle, developed test plan, test strategy, test case documents.

**Super QA**

Holds the credit of conducting both manual & automation (Selenium, CodedUI, Axe, etc.) testing.
